

Session 01

Sat 12 Sep 2026 9:06 PM

Traditional Software

Human $\rightarrow$ Software $\rightarrow$ O/P

Generative AI

Human $\rightarrow$ Intent $\rightarrow$ AI $\rightarrow$ output
 $\downarrow \rightarrow$ Understands

Agentic AI

Human $\rightarrow$ Goal $\rightarrow$ AI $\rightarrow$ Tool $\rightarrow$ Actions
 $\downarrow$
Result

5 important Terms

① AI $\rightarrow$ Artificial Intelligence

$\hookrightarrow$ Umbrella Term

① Weak $\rightarrow$ Here
 $\leftarrow$ ② General $\rightarrow$ $\hookrightarrow$ Human

③ Strong $\rightarrow$ Beyond Human

ChatGPT 6 Astra - Sep 6
 $\hookrightarrow$ General AI

2

Generative AI

AI System → Generate new content

AI Image Text

LLMs

3

Large language Model

LL

Mathematical Representation

4

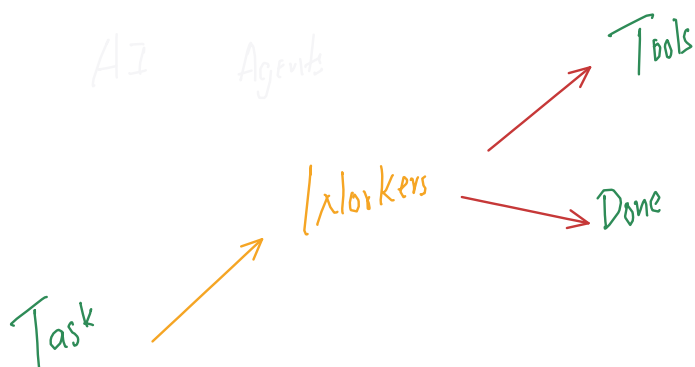

MultiModal AI

Different Modalities

Text Image Do Video Audio → I, T,

5

AI Agents

Think

Prompt = files.Image

Terms

Words → Tokens

Token ≠ Word

— whole word
— Part of word
— Punctuation
— Number
— spaces

} LLMs

Question → Token → Model → Prediction

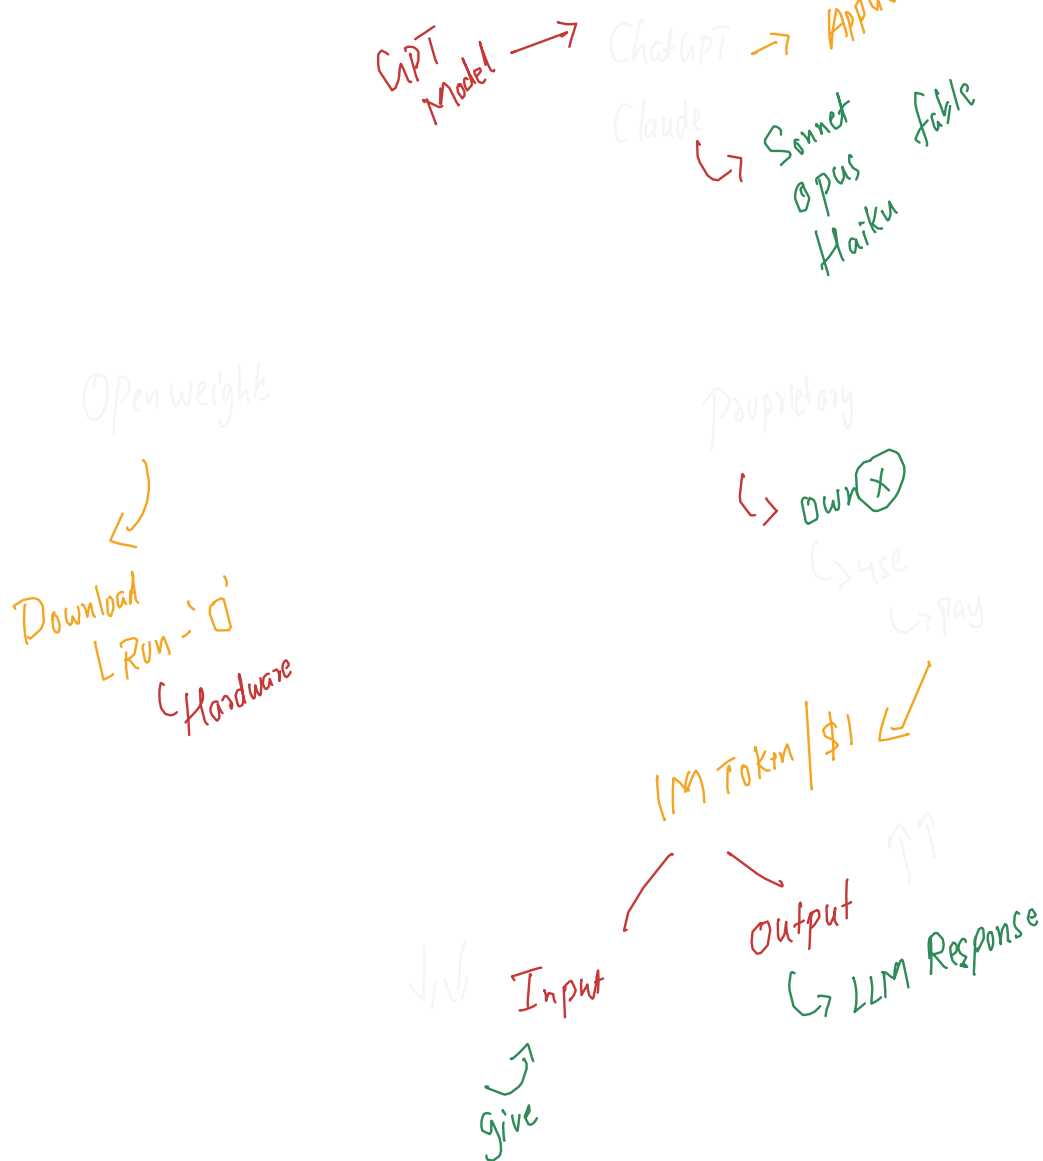

— Token
— Token
— Token

Capital of france is Paris

learned parameters + probability

Model - LLMs

ChatGPT → Preplexity → LLM → GPT Model
Claude → Preplexity → LLM → GPT Model
Gemini → Preplexity → LLM → GPT Model
Sonar → Preplexity → LLM → GPT Model
Co-pilot → LLM
grok → LLM
deepseek → LLM
Application

Parameters - Size of the Model

Billion Parameters - GPT -3 Model - 175 Billion Parameters

Trillion Parameters Models - GPT 5 - trillion Parameters

- Open AI - GPT Models
- Anthropic - Claude
- Google - Gemini
- Meta - Llama - OW
- Mistral - OW
- Deepseek - OW
- Qwen - OW

→ COMPLEXITY

Is it:

TASK → DATA → COMPLEXITY → CONSTRAINTS → MODEL

#	Business Scenario	Which Model Would You Choose?	Why This Model?
1	A CFO needs to analyse a 150-page annual report , identify financial risks, compare this year's performance with last year, and produce a detailed management briefing.	_____	_____
2	An HR team has 2,000 resumes and needs to extract candidate information, compare candidates against a job description, identify the strongest 20 candidates, and explain the reasoning.	_____	_____
3	A marketing manager needs to create a 30-second promotional video , including the concept, script, voiceover, visuals, and final video for a new product launch.	_____	_____
4	A business analyst needs to investigate why customer churn increased , using an Excel dataset, customer feedback documents, and current market information, then	_____	_____

present recommendations to senior management.

5

A company wants an AI assistant that can answer employees' questions using **500 internal policies and documents**, provide the source for each answer, and avoid making up information when the answer isn't in the documents.

What is the task?

What type of data is involved?

How much context is required?

Does it need reasoning?

Does it need current information?

Does it need to work inside an existing ecosystem?

Does it need source-grounded answers?

Does it need to create something?
